### Walkways for external applications

#### Case Study

At Cape Town International airport passengers are required to walk for long distances from the open parking areas to the terminal buildings. During the long, wet winters passengers would get soaked if no covering was provided.

Fabric : Ferrari 502S®

Fabricator : Cape Shade

#### Solution : Ferrari 502S®

ACSA selected Ferrari 502 S® Translucent fabric for the job. This water proof material was cut and welded to form a canopy stretched over a galvanised tubular steel frame to form a good looking, practical walkway, wide enough to allow pedestrians to push a trolley or pull a suitcase. The windows on the north west side also help to keep out the driving rain. Fire retardant, easy to clean and with a 5 year warranty, this material offers the perfect solution for this application.

Anti-capillarity treatment

### Anti-Capillarity Treatment

The construction of the polyester fibres prevent moisture and dirt from running through the inner layers of the material. This ensures the clear transparency of the material so that dark patches form in the fabric overtime.

Wont sag

Tear resistance

### Ultra Stable & Tear resistant

**Ferrari 502S®** is a textile designed according to an exclusive and patented process which ensures that the textile will not lose its shape or its inherent physical strength despite the tensions generated by wind, rain, hail or other climatic conditions. For this reason, **Ferrari 502S®** is preferred by architects and specifiers the world over for large exterior panels.

### Precontraint

Manufactured using the exclusive patented Precontraint Ferrari technology, the **Ferrari 502S®** textiles are maintained under tension throughout the entire production cycle. The resulting level of dimensional stability is extremely high, meaning the textiles do not deform during installation or over time.

### Fire Retardant

Fire retardant **Ferrari 502S®** is not inflammable and will only smoulder in the immediate presence of flames

### Easy Maintenance

Thanks to its new S2 varnish, maintenance of the **Ferrari 502S®** textiles merely involves a wash with water and a mild detergent. There is no mould, rotting or discolouration caused by moisture.

Fungistatic treatment

**5 Year Warranty** - backed by one of the leading manufactures in the world.

**Back-up and support from trained and experienced local suppliers.**
