

FERRARI

- World Leaders in Solar Protection

Umbrellas for external applications

Case Study

The hot, sunny pool deck needed shade both for swimmers lounging next to the pool and diners having a light al fresco meal while enjoying the lovely summer weather in Camps Bay, Cape Town.

Fabric : **Ferrari 402®**

Fabricator : Cape Shade

Solution : **Ferrari 402®**

The **Ferrari 402®** provided the ideal solution. Cut and shaped into either the conventional umbrella with centre or off centre pedestals or a gazebo with 6 pillars, the **Ferrari 402®** is stretched over the steel frame to provide a tailor-made solution for the hotel. The off centre pedestals provide support for 2 or 4 umbrellas, thus creating an uncluttered open area for tables for meals. Next to the pool each pair of chaise longues share an umbrella.

Manufactured from powder coated, tubular steel uprights with braided stainless steel cables for support and tensioning, these good looking umbrellas are effective, easy to clean and fire retardant.

Anti-capillarity treatment

Anti-Capillarity Treatment

The construction of the polyester fibres prevent moisture and dirt from running through the inner layers of the material. This ensures the clear transparency of the material so that dark patches do not form in the fabric overtime.

Won't sag

Tear resistance

Ultra Stable & Tear resistant

Ferrari 402® is a textile designed according to an exclusive and patented process which ensures that the textile will not lose its shape or its inherent physical strength despite the tensions generated by wind, rain, hail or other climatic conditions. For this reason, **Ferrari 402®** is preferred by architects and specifiers the world over for large exterior panels.

Preconstraint

Manufactured using the exclusive patented Preconstraint Ferrari technology, the **Ferrari 402®** textiles are maintained under tension throughout the entire production cycle. The resulting level of dimensional stability is extremely high, meaning the textiles do not deform during installation or over time.

PRÉCONSTRAINT FERRARI®: TECHNICAL TEXTILES

Fire Retardant

Fire retardant **Ferrari 402®** is not inflammable and will only smoulder in the immediate presence of flames.

Easy Maintenance

Thanks to its new S2 varnish, maintenance of the **Ferrari 402®** textiles merely involves a wash with water and a mild detergent. There is no mould, rotting or discolouration caused by moisture.

Fungistatic treatment

Back-up and support from trained and experienced local suppliers.

synchron

Official supplier of **FERRARI** fabric
