

FERRARI

- World Leaders in Solar Protection

Custom made structure for external application

Case Study

The client, Hollard Insurance wanted an outside covered structure for their new coffee shop. The structure needed to be a feature piece due to the buildings straight lines and prominent positioning in Maputo.

Fabric : **Ferrari 902S®**

Fabricator : Texwise

Solution : **Ferrari 902S®** tensile structure material

Ferrari 902 S® Translucent was chosen for the job due to its 10 year durability and strength. The fabric can withstand years of direct sunlight and strong wind. The Ferrari fabric is light weight and easy to tension. Once in place the structure will retain its shape even in its exposed position. The structure was designed as a cone shape to give a unique finish to the outside area and the lights attached to the inside allow the structure to be exposed from far away.

Anti-capillarity treatment

Anti-Capillarity Treatment

The construction of the polyester fibres prevent moisture and dirt from running through the inner layers of the material. This ensures the clear transparency of the material so that dark patches do not form overtime

Wont sag

Tear resistance

Ultra Stable & Tear resistant

Ferrari 902S® is a textile designed according to an exclusive and patented process which ensures that the textile will not lose its shape or its inherent physical strength despite the tensions generated by wind, rain, hail or other climatic conditions. For this reason, **Ferrari 902S®** is preferred by architects and specifiers the world over for large exterior panels.

Precontraint

Manufactured using the exclusive patented Precontraint Ferrari technology, the **Ferrari 902S®** textiles are maintained under tension throughout the entire production cycle. The resulting level of dimensional stability is extremely high, meaning the textiles do not deform during installation or over time.

Fire Retardant

Fire retardant **Ferrari 902S®** is not inflammable and will only smoulder in the immediate presence of flames

Easy Maintenance

Thanks to its new S2 varnish, maintenance of the **Ferrari 902S®** textiles merely involves a wash with water and a mild detergent. There is no mould, rotting or discolouration caused by moisture.

Fungistatic treatment

10 Year Warranty - backed by one of the leading manufactures in the world.

Back-up and support from trained and experienced local suppliers.

synchron

Official supplier of **FERRARI** fabric
